Recommendation for Recoverage of Certain Areas in Cuba\*

1. The COMOR approved a draft paper on the above subject as amended. The approved version has been distributed as COMOR-D-24/6.

2. It was agreed that upon receipt of the photography the NPIC would provide an immediate crash readout of those select requirements identified by ONI on behalf of CINCLANT, whereupon the full preliminary report would be issued on a normal schedule.

Highest Priority Reconnaissance Requirements

3. Colonel Winterbottom distributed to the members a folder on the above subject which contains the full IBM run on the 1-A list of

highest priority targets of the COMOR's requirements. Category 1, it was explained by Colonel Winterbottom, will not be issued until certain adjustments in AFCI are completed in regard to the marriage of the IBM run and A. I. F. tape. Meanwhile, however, the earlier Air Force issuance of Category 1 targets is in the hands of the members and may be used as reference as required.

4. The subject issuance along with the approved COMOR guidance for preliminary interpretation completes the current examination of highest priority requirements of COMOR, except that the Air Force will shortly issue for the convenience of the members the overlay charts for Priorities 1-A and 1 similar to those which it used in its satellite reconnaissance concept (Cf. COMOR-M-14, paragraph 4).

#### Reconnaissance of the Dominican Republic

5. The COMOR considered, but decided against, proposing at this time targets for reconnaissance over the Dominican Republic or any targets in Cuba which might be used in an invasion of the Dominican Republic by Cuba.

6. Commander Myles noted that CINCLANT is currently conducting recce over the Dominican Republic. He made arrangements for dissemination of the readout of such photography to the members. 50X1
